

XM radio weather & traffic allows me to travel between major cities before I get to that particular metropolitan area & know what traffic patterns to bypass. When traveling down Interstate 95, especially in the Wash. D.C. area(you know what I mean!!!!!!) I do not know what AM or FM station to tune into for local traffic. I can adjust my traveling accordingly.

Also, knowing that there is bad weather ahead of me allows me while I am on the road to adjust my plans.

Leave XM alone & spend the time convicting real criminals.
